

**TOWN COUNCIL REPORT
RESILIENCY COMMITTEE
DECEMBER 8, 2023**

The Resiliency Committee convened their first meeting on October 30th. As this was the initial meeting of the group, it focused on reviewing the committee's purpose and scope of work; sharing takeaways from the resiliency report prepared for the Town in March 2023; and discussing potential resiliency projects.

At our second meeting on November 21st, we reviewed a draft scope of work for the York Road Flood Mitigation Project for which we were awarded a Hazard Mitigation Grant through FEMA. The project will assess existing and future conditions of York and secondary roads and design a roadway improvement plan. We also discussed potential projects for the current available funding opportunities including two FEMA grants and the US Army Corps of Engineers Section 219 program.

Respectfully submitted,
Edie Dondero, Chairperson
