

Canal Friendly Weed Killer

If you need to kill weeds, here's a safer alternative that is effective and lower cost than some herbicides.

Mix together:

- ½ gallon of 45% vinegar
- ½ gallon of water
- 4 tablespoons of table salt
- 2 tablespoons of Dawn dishwashing soap

Be sure to use 45% vinegar – its not what you use for cooking. You can find it at Amazon, Walmart, and other stores. The estimate a gallon of this mixture will cost about \$11, compared to almost \$15 for premixed Roundup.
