

**TOWN COUNCIL REPORT
RESILIENCY COMMITTEE
MAY 10, 2024**

The Resiliency Committee scheduled for Monday, April 29th was cancelled due to illness.

The team from AECOM working on the York Road flood mitigation project have been studying tidal data from the Jefferson Creek tide gage and have run some flood inundation models to determine at what elevation the roadway will need to be elevated to avoid most flooding scenarios. Survey work and wetland delineation are tentatively scheduled for the week of May 13. The work should take approximately three days.

Respectfully submitted,
Edie Dondero, Chairperson
