

**TOWN COUNCIL REPORT  
RESILIENCY COMMITTEE  
OCTOBER 11, 2024**

The Resiliency Committee has not met since the last Council meeting.

AECOM continues its work on the York Road Flood Mitigation Study and made field visits to South Bethany daily during the recent flooding events to observe and monitor conditions.

Between meetings, the Committee is planning to host a resiliency forum in late November/early December. Representatives from the other six coastal towns will be invited to share and discuss their own resiliency-related projects and challenges. Potential speakers from relevant state and/or federal agencies are being secured.

Respectfully submitted,  
Edie Dondero, Chairperson
