

**REPORT TO TOWN COUNCIL
RESILIENCY COMMITTEE
MARCH 14, 2025**

The Committee last met on February 25, 2025, and is scheduled to meet again later this month.

The Committee in February received Council approval to submit a BRIC grant for additional flood mitigation studies in the southern end of Town. At this meeting, details of the grant request will be shared with Council. The application is due to DEMA on April 1st.

The Committee is working in concert with the Town Manager on a resiliency action plan for the Town. The plan contains several categories of action including mitigation; code review and revision; resiliency funding; and resident outreach and education.

Final approval of the FY23 BRIC grant for a flood mitigation study in Cat Hill is still expected by the end of March, as per DEMA staff.

Respectfully submitted,
Edie Dondero, Chairperson
